In January 2021 President Trump invited the American people to a peaceful protest in DC where my husband, 14 year old daughter and I along with several church members and friends traveled to the rally.

Fast forward to May of 2021 we caught the FBI following us to church and saw them sitting in our neighborhood for weeks.

6 weeks later on June 30th at 5:45am our home was raided.

50 plus swat agents and homeland security agents, and 4 armored tanks threw flash bang grenades at and in our home. They called us out of our home one by one, my children included, with lasers on us at gunpoint. The force they used was so excessive and violent that my pictures in my home were knocked off the walls from the flash bangs, my carpets were burned up. It was so traumatic and when I walked out my front door it looked like a war zone.
